

# Importing from PubMed to WebCV

(last updated: June 2014)

You can import individual publications from PubMed to WebCV through the use of PubMed ID numbers.

# 1. Go to PubMed and search for the publication citation you wish to import

The screenshot shows the PubMed website interface. At the top, there is a navigation bar with "NCBI Resources" and "How To" links. The main header features the "PubMed.gov" logo and the text "US National Library of Medicine National Institutes of Health". A search bar contains the text "bold m" and a "Search" button. Below the search bar, there are three main sections: "PubMed" (describing the database's 23 million citations), "PubMed Commons" (describing the new commenting system), and three columns of links: "Using PubMed", "PubMed Tools", and "More Resources".

**PubMed**  
PubMed comprises more than 23 million citations for biomedical literature from MEDLINE, life science journals, and online books. Citations may include links to full-text content from PubMed Central and publisher web sites.

**PubMed Commons**  
PubMed's new commenting system

6. Keep in mind that there may be pieces of data that were not part of the original PubMed citation (e.g., Publication Type, Peer Reviewed, Publication Status, Role, etc.). It is therefore important to review the imported publication citation to ensure that the imported data is complete and correct
